WORK EXPERIENCE

Osapiens GmbH.
2022 May -2024-April

Software Developer

- Enhanced a command-line tool needed for the company's workflow, making it easier to pull and deploy backend resources.
- Contributed to the company component library using React, Material-UI, and Storybook to make sure all projects had consistent user interface elements. Took an active role in the creation of new components.
- Contributed to the development and maintenance of the Osapiens webpage (Next.js and Material-UI.), adding new features and fixing bugs.
- Contributed to the BrandOs Software solution, concentrating on bug fixes and feature implementation, primarily in the portal's front end using React, TypeScript, and Material-UI, additionally, in back-end and mobile (React Native).
- Actively participated in the development of the KIV Software solution, focusing on implementing new features and resolving existing bugs. Primarily worked on the front end of the portal using React, TypeScript and Material-UI, with additional involvement in the back-end and mobile (React Native).

EDUCATION

CareerFoundry, 2021
Jan - Sept 2021

Full stack Immersion

Completed an intensive 8-month CareerFoundry Full Stack Web Development BootCamp, where I mastered front-end and back-end technologies, developed multiple projects, and honed my coding and collaboration skills.

SKILL

Javascript , React, Express JS, Material UI ,Typescript, MongoDB, React Native, NextJS, Git

PROJECTS

Full-Stack Trello Clone (MERN Stack)

Developed a fully functional Trello clone using the MERN (MongoDB, Express.js, React.js, Node.js) stack. The application allows users to seamlessly create, edit, delete, and drag-and-drop tasks across boards. This project demonstrates expertise in building dynamic, responsive interfaces and implementing robust backend solutions, ensuring a smooth and user-friendly experience.

CBD Shop Front-End Clone (React&Material UI)

Developed a responsive front-end clone of a CBD shop using React and Material UI. The application allows users to browse products and add items to their shopping list, showcasing proficiency in modern UI/UX design principles and front-end development.
